

Workshop Objectives

C-ITS deployment is underway and initially progressed in corridor projects and pilots all over Europe. The Amsterdam Group and the CODECS partners aim on harmonising the ongoing activities in these various deployment hot spots. The full-day workshop is set aside for discussing their work with other stakeholders and interested organisations. It gives initial deployment activities as well as related initiatives a platform to present their current status, declare their experiences and address open deployment issues.

Organisers

Amsterdam Group

The Amsterdam Group is a strategic alliance of committed key stakeholders with the objective to facilitate joint deployment of cooperative ITS in Europe. It includes the umbrella organisations CEDR – ASECAP – POLIS – CAR 2 CAR Communication Consortium and supports the information exchange, discussion and creation of joint solution approaches on open deployment issues.

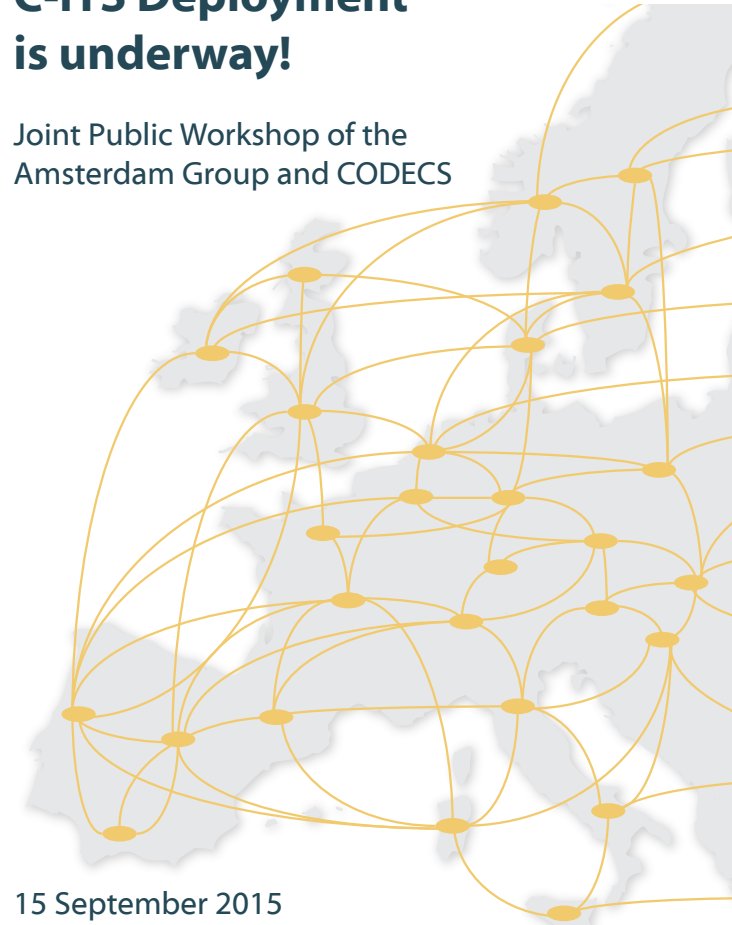

CODECS

CODECS (**CO**operative ITS **DE**ployment **CO**ordination **S**upport) acts as nodal point pooling the interests of stakeholders involved in the consecutive C-ITS implementation phases. It builds up a stakeholder network and, through interactive discussion in workshops, webinars and personal interviews, CODECS-partners identify functional approaches, roles & responsibilities, preferred use cases and requirements for strategic decision making. Out of the consolidated stakeholder needs and priorities, it develops guidelines for initial deployment as well as testing, specification and standardisation in later innovation phases.

C-ITS Deployment is underway!

Joint Public Workshop of the Amsterdam Group and CODECS

15 September 2015

Roskilde, Denmark

CODECS has received funding from the European Union's Horizon 2020 research and innovation programme under Grant Agreement No 653339.

Tuesday, 15 September 2015

09.30 Welcome & Registration

10.30 Opening

Frans op de Beek
